

Intern @ Digital Workplace

What's the role?

We are looking for an experienced IT Workplace Solution Engineer with a passion for user needs and the desire to provide innovative and reliable IT solutions to the Business.

Who is Hilti?

We provide leading-edge tools, technologies, software and services for the global construction sector. We have a proud heritage, built over 75 years, and a worldwide reputation for pioneering products and exceptional service. With some 25,000 people in more than 120 countries, we're a great place for you to show us your worth as you learn, grow and carve-out your career.

Within Hilti, Global IT develops together with our Business Units and Market Organizations global solutions to drive the digital transformation of Hilti. Our three strategic locations - Buchs (CH), Kuala Lumpur (MY) and Plano, Texas (US) - offer a truly global perspective.

Hilti Asia IT Services Sdn Bhd (HAITS) in Kuala Lumpur provides IT services, solutions and support to the Hilti Business in more than 120 countries. We have over 100 employees of more than 10 nationalities and are rapidly growing. Our team in Kuala Lumpur is a fully recognized and respected competence centre that is covering all relevant areas of IT.

About our team

We design, implement and manage the agile IT solutions and services with the latest technologies to drive business operational excellence. Our dynamic team enables secure and reliable services based on user centricity and business group focus which improve our users' productivity. We invest our resources in exploring product innovations such as HoloLens, whilst fostering strong partnership with tech giants like Microsoft and Citrix. Our strategic projects include but are not limited to Use Your Own Device (UYOD): Work Anywhere & Anytime – Virtual desktop environment and Hybrid Device Rollout for Mobile Sales Force.

What does the role involve?

In this role you will take over technical leadership for parts of our workplace infrastructure with a special focus on technology solutions like Windows 10, Office 365, Microsoft SCCM, Intune, Airwatch and Citrix. You will work closely with our user group representatives and business partners to analyze and understand the business requirements and translate them into reliable and value-creating technical solutions. The role offers you the opportunity to work with the latest IT technologies and implement innovative devices like tablets, hybrids, smartphones, and wearables. You will be part of a truly global and highly innovative IT team.

Our Workplace solutions create positive impacts on how 25,000 people all around the world are working daily

What do we offer?

Show us what you're made of and we'll offer you opportunities to move around the business – experience different job functions and international career opportunities. You will be rewarded for your performance and get a chance to work with one of the largest single instance SAP implementations in the world and transformation towards S4/HANA. On top of that, each new hire will be sent for relevant local and international training to get them started for their career journey at Hilti.

We have a very thorough people review process, unlike any we know of in any other business. We screen everyone in the company in a yearly career performance matching process. It means we can pair talent with opportunities - developing our people in their current roles or challenging them to work in new ways or in new places. It's how we find the right fit and

further our teams personally and professionally. Based on this, each individual employee will have a clearly defined career development track.

Why should you apply?

- We have an excellent mix of people, which we believe makes for a more vibrant, more innovative and more productive team. Become a valuable member of our highly professional and international team of IT experts and meet the challenges of a global multinational company using latest technologies.
- Freedom to act in the responsible area
- Career prospects in a dynamic environment, excellent opportunities to develop yourself to higher levels and wider range of knowledge
- Our team in Kuala Lumpur is a fully recognised and respected competence center that is covering all relevant areas of IT.
- 80% of the top positions are filled internally
- We have a clearly defined career development track for every individual employee
- We have an excellent team and are duly rewarded by performance

We would love to hear from you if:

You possess the following:

- Bachelor's Degree in Information Technology, Computer Science or Engineering (CGPA > 3.5 or similar grading is a must)
- Strong analytical skills with an affinity to digital workplace technologies
- Ability to understand business requirements and translate them into reliable and value-creating technical solutions
- Team players who enjoy working in multicultural teams located at different locations globally
- Excellent communication and collaboration skills
- Fluent in English (verbally and written)
